

## COOKING with TECHNOLOGY – an ATEN Experience Workshop

**Australian Masterchef**  
Adam Liaw

We are always looking for ways to engage and improve our Students experience at VIVE Cooking School. I am very impressed by the support and solution that ATEN has provided to our school. Not only we are now capable to deliver a higher experience thanks to ATEN seamless technology, but we know that the support team is very professional and reliable.

Jean-Luc Tan - Founder CEO.

Taking place at the VIVE Cooking School, guests will enjoy a once-in-a-lifetime experience, learning to cook a meal from celebrity chef, author, host of the SBS food and travel program Destination Flavour, and 2010 MasterChef champion Adam Liaw.

VIVE Cooking School uses ATEN's video distribution technology, up-close images of Adam's cooking will be captured and distributed throughout the facility so attendees can see exactly what is happening on stage.

### Challenges

- Need to switch cameras manually from laptop
- Current device only has one video feed output
- No centralised control to allow for switching multiple inputs to multiple outputs
- Chef demonstration difficult to see for all students in room

### Benefits

- Video Matrix VM5808H and ATEN Control System VK1100 allows profiles to be pre-set so that the inputs → outputs routing is done once via an online browser setup
- Video Matrix VM5808H and ATEN Control System VK1100 local output for each input allows new solution to slot in with current one
- ATEN Control System VK1100 allows for easy switching of Video Matrix VM5808H screen setup and centralised control
- Allow system control from tablet

# Solutions

- Video Matrix Switches  
VM5808H

- ATEN Control System –  
Compact Control Box  
VK1100

- Video Converters  
VC480

- HDMI Dongle Extender  
VE819
